PROFESSIONAL SUMMARY

Motivated B.Tech student in Artificial Intelligence and Data Science with hands-on experience in Python, Machine Learning, Data Preprocessing, Model Training, and Model Evaluation. Proficient in Pandas, NumPy, Scikit-learn, API Integration, Workflow Automation, and UI/UX Design through internships and academic projects. Strong analytical, problem-solving, and critical thinking skills with a passion for developing AI-powered, data-driven solutions. Seeking an entry-level AI Engineer role to contribute to innovative Artificial Intelligence and Machine Learning applications.

EDUCATION

B.Tech – Artificial Intelligence and Data Science | CGPA- 8.71

2023-2027

Jeppiaar Institute of Technology

SKILLS

- **Programming** - python
- **Design** - UI&UX
- **Tools** - Figma, Github,
- **Web development** - HTML, CSS, Bootstrap
- **Machine learning** - Scikit-learn
- VS code, Adobe Photoshop

INTERSHIPS

Artificial Intelligence & Machine Learning Intern – Codetech IT Solutions

APRIL-2025

- Developed machine learning models using Python, Pandas, NumPy, and Scikit-learn, including data preprocessing, feature selection, and model evaluation with performance metrics such as accuracy, precision, and recall.

UI/UX Design Intern – Codebind Technologies

JULY-2025

- Designed responsive UI/UX interfaces, wireframes, and interactive prototypes using Figma by applying usability, accessibility, and user-centered design principles for web and mobile applications

Full Stack Developer Intern – TVK Technologies

NOV-2025

- Supported front-end and back-end development, debugging, feature enhancement, and basic API integration while maintaining web applications.

PROJECTS

AI-Powered Personalized Learning Path Generator

Developed a Python-based machine learning recommendation system for skill gap analysis and personalized learning paths using data preprocessing, predictive analytics, user profiling, and Scikit-learn.

Healthcare Application (UI/UX Design)

Designed a healthcare mobile application in Figma by creating responsive UI/UX, wireframes, interactive prototypes, patient management modules, and user-centered workflows following usability and accessibility principles.

Daily Reminder Bot (n8n Automation)

Built an automated workflow using n8n by integrating Google Sheets, email automation, scheduled triggers, and event-driven notifications to improve task management and productivity.

CERTIFICATIONS

- Python Programming with Projects – **Infosys Springboard** , AI for Beginners – **HP**
- Power BI for Beginners – **Microsoft**

ACTIVITIES

- Participant – Smart India Hackathon (Problem Solving Exposure), Completed Data Analytics Workshop (5 Days Hands-on Training)
- Attended National Seminar on AI-based Medical Sensor Systems
